The Brookings Institution and Project for Public Spaces have begun an 18-month study of Oklahoma City’s emerging innovation district, an area encompassing the Oklahoma Health Center and Automobile Alley. This work, which will focus on the district’s economic strengths and quality of place, is part of the Bass Initiative on Innovation and Placemaking, a joint initiative the two organizations launched last month.

The study will examine the rising interplay between innovation, quality places and economic growth by studying innovation districts in Oklahoma City and Philadelphia. The work aims to catalyze a new approach to city-building that integrates the reinforcing benefits of

**NRHA Celebrates 50th Anniversary, New Location**

The National Reining Horse Association (NRHA) kicked off a period of celebration last month as they moved into their new international headquarters in Oklahoma City. The move will be followed by the 50th running of the NRHA Futurity on Nov. 26 – Dec. 5. This pinnacle event will kick off NRHA’s 50th Anniversary year in 2016. With this major event comes the introduction of a new image, brand and look for the future of this growing organization.

“The NRHA has long been a partner in Oklahoma City’s hospitality industry, and their annual Reigning Futurity brings around 6,000 visitors to Oklahoma City each year,” said Natalie Shirley, president of Oklahoma State University-Oklahoma City and Chamber vice chair of convention and visitor development. “We are proud to celebrate this milestone for their organization and look forward to many more years of partnership with the NRHA.”

The new international headquarters will reside on the south side of State Fair Park in Oklahoma City. A special ribbon cutting ceremony will take place during the 50th Running of the NRHA Futurity. Spectators and members are encouraged to view the building on Reno Avenue in Oklahoma City.

---

Oklahoma City District to be Focus of Brookings Study

The National Reining Horse Association recently moved into their new international headquarters in Oklahoma City.
We put people first to build relationships that last.

At Enable Midstream Partners, we define success a little differently. For us, it’s all about relationships. Because when you connect the right people for the right reasons, amazing things happen.

We’re building bonds of trust to achieve unparalleled success – for our customers, employees and the communities where we live and work.

Enable Midstream Partners. A Partner in Your Success.
Leadership Notes

More than a district

The announcement that Brookings will partner with Oklahoma City to study the best way to create innovation districts is exciting for several reasons. This partnership offers an opportunity to bolster a district that is ripe with potential. The area stretching from Automobile Alley to the Oklahoma Health Center already has the ingredients to make it a thriving area. It has creative thinkers, entrepreneurial startups and anchor institutions. With the insight of Brookings and the Project for Public Spaces, this area near downtown Oklahoma City will become a more balanced urban enclave of innovation.

The qualities that drive innovation and the creation of innovation districts, according to the report by Brookings entitled “The Rise of Innovation Districts,” include an environment rich with networking assets – “relationships that have the potential to generate, sharpen and accelerate the advancement of ideas.” While that description may not have been written with Oklahoma City in mind, it perfectly describes the synergy that has created what Oklahoma City has today. From the public-private partnerships that have revived areas across Oklahoma City to the entrepreneurial spirit that has created jobs and capital investment, Oklahoma City has created its best assets through relationships that have championed new ideas.

In actuality, the partnership with Brookings and PPS is about more than just one district of Oklahoma City. While the Oklahoma Health Center will be a case study for using public spaces to benefit development, the true benefits of this partnership are much further reaching. We will be able to apply the findings of this study across Oklahoma City. I am confident that this partnership will not only increase innovation in the Oklahoma Health Center, but also create areas of innovation across Oklahoma City.

Sincerely,
Roy H. Williams, CCE
President & CEO

Roy H. Williams, CCE
Chamber CEO & President
NHRA 50th Anniversary
(cont’d from page 1)

“This new facility will be a beautiful addition to State Fair Park. We are excited to work with NRHA on the development of this building, and being the horse show capital of the world, we think this new facility puts an exclamation point on that statement,” said State Fair Park Vice President Bill Allen. “This will be a great place to come learn about the sport of reining as well as an excellent office complex for the staff to have an extremely pleasant workspace to help continue to grow this excellent organization.”

To coincide with its new location and its 50th anniversary, NRHA unveiled a new logo to celebrate the future of this great organization. The logo was studied by a team of marketing professionals to redesign a mark that celebrates the history of the past 50 years and provides NRHA with a look and feel to point towards the next 50. The design comes with a new color palette, a redesigned sliding horse and a cleaner look.
Q&A with State of the Economy Keynote Speaker

At the upcoming State of the Economy on Thursday, Nov. 19, at the National Cowboy & Western Heritage Museum, keynote speaker Vivek Wadhwa will provide attendees with insights on how the development of technology will drive economic prosperity and innovation. The following Q&A with Wadhwa gives a preview of what will be discussed at the upcoming event.

POINT: How does the application of innovation across sectors change an area’s economy?

Wadhwa: Every 30-40 years, America reinvents itself. It lets loose its spirit of entrepreneurship and innovation and leaps ahead of the rest of the world. That is what is happening now. A broad range of technologies is now advancing at exponential rates and converging. These are making amazing things possible and will cause disruptions to industries—and regions—while they create new opportunities.

Industries and regions that understand and leverage these new technologies to rebuild themselves will benefit in big ways; others will be left behind. It has become possible to create new, trillion-dollar industries. These can be in any region that takes the lead.

What types of trends do you see currently shaping globalization and innovation across the world?

Computing is advancing at exponential rates, and it is causing every technology that it touches to go on the same path that it is on. This is happening to sensors, networks, artificial intelligence, 3D printing and robotics. The convergence of these technologies is making it possible to transform medicine, manufacturing, finance, transportation and most industries. The cost of building world-changing technologies has dropped to the point that entrepreneurs can do what only governments and big research labs could before: solve the grand challenges of humanity. These entrepreneurs can be anywhere—innovation has globalized.

As technology continues to advance, how is that changing the landscape of the global economy?

There will be dramatic changes. America is leading the innovation and will be a beneficiary. The developing world which has been suffering due to lack of infrastructure, education, energy and healthcare, for example, will hugely benefit—because the same advances that are available to us will be available to its people. China will be a big loser because its export manufacturing industry will essentially implode—we won’t need their people to manufacture our goods because our robots and 3D printers will be able to do a better job. The oil exporting economies will also be “toast”—because clean energies such as solar and wind will be inexpensive and provide 100 percent of the Earth’s energy needs.

The next two decades will both be dramatic and traumatic. The human race will have a chance to uplift itself and evolve.

In light of those changes, what industries do you predict will grow the most over the next 20 years?

Industries that can adapt to the change and lead it, that can take advantage of exponential technologies and use these to solve big problems.

With the upcoming presidential election in 2016, how do you see those outcomes impacting the economy?

Our presidential candidates and political leaders simply don’t understand the depth and breadth of the changes that are in progress. They are still looking backwards and thinking backwards. So I see no impact on the debate or outcome. This will change in the future, when our leaders will be required to help lead the social transformation. But that is about two or three elections away.

How do you see the U.S. economy changing in response to instabilities in the European Union and in Asia?

We are going to be further ahead economically even though there will be turbulence from the fall of China, Russia, and the Middle East.

Last Chance to Network with the Chamber in 2015

Don’t let the year conclude without taking full advantage of your Chamber membership. Be sure to attend one of the Chamber’s upcoming networking events and make new contacts.

**MegaLunch: Nov. 5**

Take a break from sales calls and have fun networking in a unique way at the last 2015 MegaLunch at NOAH’s Event Venue on Thursday, Nov. 5, from 11 a.m.-2 p.m. For more information, visit www.okcchamber.com/events.

**Member Orientation: Nov. 10**

If you want to better understand how the Chamber works in the community and how it can benefit your business, attend the Chamber’s Member Orientation. The last orientation of 2015 will take place on Tuesday, Nov. 10, from 8:30-10 a.m. at IBC Bank, 3817 Northwest Expressway, Suite 100. There is no cost to attend. Register online at www.okcchamber.com/events or contact Amanda Bowen at abowen@okcchamber.com or 297-8961 with questions.

**Sunset Receptions: Nov. 3 and Dec. 1**

At Sunset Reception, Chamber members open their doors to the public for networking in a casual atmosphere. Food and drink are provided at these free events. Join the Chamber for the last two receptions of 2015 on Tuesday, Nov. 3, at the Colcord Hotel and Tuesday, Dec. 1, at J. Bruner’s at the Haunted House.

**Chamber Forum: Dec. 2**

The challenges presented by the current Oklahoma County jail are well documented. Join criminal justice experts and community leaders to discuss solutions at the upcoming Chamber Forum on Wednesday, Dec. 2, from 11:30 a.m.-1p.m. at the Skirvin Hilton.

A panel of experts will discuss broader solutions to improving Oklahoma County’s criminal justice systems, and the varied tactics that our community can use to address the jail facility, sentencing reform, care for the mentally ill and more. The event will also educate attendees about successful programs in other communities that are redirecting people and funds away from incarceration and toward rehabilitation. Tickets are $35 for Chamber members and $50 for nonmembers. Special thanks to Signature Sponsor Cox Business.
Learn about OKC’s Legacy of Leadership

Oklahoma City’s rise as an ideal city to live and work came as a result of incredible visionaries. Learn more about Oklahoma City’s legacy of leadership at the Chamber’s 2015 Annual Meeting on Thursday, Dec. 10, 11 a.m.-1 p.m., at the Cox Convention Center, 1 Myriad Gardens. This luncheon will inform and motivate attendees as it celebrates the accomplishments of Oklahoma City.

The meeting will feature a discussion with some of the state’s notable leaders about the visionary leadership that transformed Oklahoma City into a thriving community. The conversation, which will be moderated by Chamber Chair David Rainbolt, BancFirst Corporation, will include:

- The Honorable Frank Keating, former governor, State of Oklahoma; president and CEO of the American Bankers Association
- J. Larry Nichols, executive chairman, Devon Energy Corporation
- The Honorable Ron Norick, former mayor, City of Oklahoma City; managing partner, Norick Investment Company, LLC

Rainbolt will also highlight the Chamber’s 2015 accomplishments and 2016 goals. Tickets are $75 for Chamber members and $125 for nonmembers. For more information or to purchase tickets, email register@okchamber.com or call 405-297-8921. Special thanks to Signature Sponsor Bank of Oklahoma.

Gary knew that for most of Oklahoma’s WWII heroes, traveling to D.C. to visit the WWII Memorial would be difficult if not impossible.

Gary’s solution? He launched Oklahoma Honor Flights as a means to get them there. Then he turned to The Oklahoman to tell the story. The result? “The coverage we received in The Oklahoman brought some big time responses in terms of financial support,” Gary says. “With The Oklahoman’s help, we were able to send over 2,000 WWII veterans to the memorial.”

That’s why Gary says, “The Oklahoman has literally put feet and wings to our organization.”

It’s people like Gary who make us all proud to be Oklahomans.

Brookings and PPS to Study OKC district (cont’d from page 1)

vibrant public spaces, innovative urban economies and inclusive growth.

“Oklahoma City is an innovative community, and Brookings and PPS’s study will allow us to continue to realize and capitalize on our assets,” said Roy H. Williams, CCE, president and CEO of the Greater Oklahoma City Chamber. “The continued growth of Oklahoma City’s medical center and the surrounding areas will bolster the economy and strengthen the bonds of collaboration. And equally important, the lessons learned during this project will be applicable to other areas of Oklahoma City.”

The Bass Initiative will build on Brookings’s research on innovation districts — dense, amenity-rich enclaves that are typically anchored by research and development institutions and facilitate new ideas and businesses — and PPS’s long track record in placemaking, a participatory community process to develop quality public spaces by capitalizing on a community’s assets and potential. It will encourage mixed-use entrepreneurial and cultural districts through research, network building, and on-the-ground projects, including studies of the innovation ecosystems.

“Oklahoma City has systems in place that support an innovating community, but there is room for growth,” said Tom R. Gray, III, president of the Presbyterian Health Foundation. “As the world continues to evolve, we have to evolve with it. Working with these entities will help us understand how to continue our forward momentum.”

“Oklahoma City is an innovative community, and Brookings and PPS’s study will allow us to continue to realize and capitalize on our assets.”

- Roy H. Williams, CCE, president and CEO of the Greater Oklahoma City Chamber

The initiative’s Oklahoma City study will use quantitative analysis of both local and national data as well as stakeholder interviews to audit the innovative industries and networking and physical assets in the burgeoning innovation district. Drawing from this study, Brookings and PPS will work with community leaders to create a unified vision and specific strategies for the district’s future growth in order to bolster the district as a key driver of the regional economy.

“As the epicenter of research, health care, education and technology in the state of Oklahoma, the Oklahoma Health Center Foundation recognizes this district’s potential for growth,” said David Harlow, chairman of the Oklahoma Health Center Foundation board of directors. “We believe that engaged local partnerships and creative problem solving are the keys to increasing our innovation. Brookings and PPS bring a perspective to the table that will help us get to where we need to be.”

The Oklahoma City study is funded through a partnership of community organizations including the Greater Oklahoma City Chamber, the Presbyterian Health Foundation, the Oklahoma Health Center Foundation, the City of Oklahoma City and the Alliance of Economic Development for Oklahoma City. Additional community supporters include the Oklahoma Medical Research Foundation and the University of Oklahoma.

“We have the potential to enhance this area to attract more innovation, more investment and more qualified workers,” said Cathy O’Connor, president and CEO of The Alliance for Economic Development of Oklahoma City. “Using these resources in this district and across the city will impact our ability to attract new companies and employees to all areas of Oklahoma City.”
What are innovation districts?

Innovation districts are an emerging trend in urban areas designed to “spur productive, inclusive and sustainable economic development” by designing spaces to connect people where they are, notes the Brookings Institute’s Bruce Katz and Julie Wagner in “The Rise of Innovation Districts: A New Geography of Innovation in America.”

Defined by a specific geography, with a special focus on areas with strong entrepreneur, science and technology communities, innovation districts enhance those spaces with a mash-up of institutions, schools, mixed-use development like residences, retail stores and office space, bike-sharing and more. These spaces make it easier for people to congregate, collaborate and network — to share ideas that can lead to more development, access to capital and commercialization. And they end up drawing people from elsewhere in the community to visit, leading to more growth.

Why Oklahoma City?

The thriving area surrounding the Oklahoma Health Center is ripe for new development and has demonstrated success in incubating startup businesses by providing inexpensive lab and office space to promising companies. The selected innovation district area has momentum and clear strengths and assets.

The city’s bioscience sector that has clustered in that area offer a strong anchor point for future development, and Oklahoma City already has shown its ability to work together to re-imagine some of its urban areas. Just look at the revitalization spurred by the Metropolitan Area Projects (MAPS) and the transformed Bricktown and the various districts around the city.

The Innovation District takes that re-imaging to the next level, focusing on an area that has a lot of potential to bring together a community, attract new companies and employees and enhance an area.

Why work with Brookings Institution and Project for Public Spaces (PPS)?

Both entities have done extensive work on innovation in communities and “placemaking.” They will be building on the area’s economic strengths and quality of place.

Brookings and PPS have worked together to help economic, physical and networking assets of a defined innovation district to create synergy. And using their extensive resources, they will study Oklahoma City’s strengths in order to help its leaders craft a unified vision for the area.
Where in Oklahoma City?
The emerging innovation district in Oklahoma City includes the Oklahoma Health Center, Automobile Alley, the GE Global Research Oil and Gas Technology Center as well as surrounding areas. It crosses Broadway/Interstate-235. It includes five percent, or 17,900, of the city’s jobs, according to Brookings.

In the coming months, you’ll be reading more about this unique partnership with Brookings and PPS and how other communities have created the same synergy with their own innovation districts.
Crowe & Dunlevy

Established in 1902, Crowe & Dunlevy is not only one of Oklahoma's oldest law firms, but also holds the distinction of being the state's first law partnership. Charles Edward “Olie” Johnson opened the first law office in Oklahoma Territory at 131 1/2 W Grand Ave. (now Sheridan Avenue). When Albert P. Crockett joined Johnson one year later, the two created what is now known as Oklahoma Territory's first law partnership.

Crowe & Dunlevy took an active part in the development of Oklahoma City well before it became the state capital. In 1905, while working at the Lee Building on the corner of Main and Robinson—its third office in four years—the firm applied for membership with Oklahoma City's Chamber of Commerce, a move that strengthened its connection to the city's growing entrepreneurial population. Johnson, Crockett and their subsequent partners built upon their early success model, recruiting attorneys and strengthening their dedication to Oklahoma's future. By 1929, when V.P. Crowe joined the firm that still bears his name, he was already well-established in the legal field through his tenures as the

During the firm's history, Crowe & Dunlevy's office locations have included Oklahoma City's first skyscraper, the Lee Building, and the First National Center, pictured above.

Johnson, Crockett and their subsequent partners built upon their early success model, recruiting attorneys and strengthening their dedication to Oklahoma’s future. By 1929, when V.P. Crowe joined the firm that still bears his name, he was already well-established in the legal field through his tenures as the
Garfield County attorney in Enid and the assistant attorney general for the State of Oklahoma.

In addition to its contributions to the development of Oklahoma City’s legal culture, for more than a century Crowe & Dunlevy has maintained a significant professional presence in the downtown area. Having previously occupied offices in historic landmarks like the Perrine Building, the First National Building, the Liberty Tower and the Mid-America Tower, the firm is now the anchor tenant in the recently renovated Braniff Building. From this seat at the center of the revived downtown Oklahoma City and two expansion offices located in Tulsa and Norman, Crowe & Dunlevy is able to provide counsel for and comprehensively address the diverse needs of a broad range of clients.

Crowe & Dunlevy remains a leader in the Oklahoma City community today, exhibiting a quality of practice that has earned the firm multiple national distinctions. In 2015, Crowe & Dunlevy was the only Oklahoma law firm to achieve Band 1 ratings from Chambers USA in the seven major areas of practice, while U.S. News recognized the firm with the most Tier 1 practice area rankings in Oklahoma. The firm’s success as a whole is a reflection of the combined contributions of its individual attorneys and legal staff, who regularly demonstrate their commitment to giving back to the community not only through pro bono work, but also ongoing support of more than 75 local organizations and an annually awarded scholarship. As of 2007, Crowe & Dunlevy has also been the organizing force behind the Oklahoma Law Alliance, a cooperative group of statewide law firms whose mission is to strengthen Oklahoma’s legal community.
Members Show Support for the Work of the Chamber

The following member companies increased their investment during July - October 2015, demonstrating strong support of the Chamber’s efforts to drive the city’s economy and make this the best place to live, work, play and visit.

An investment in Human Capital

Your organization’s employees are among its greatest assets. Putting the OU Medicine YourHealth program to work for you can help promote better health and increase retention of these valued employees.

Find out how the YourHealth program can help your organization decrease healthcare costs, reduce absenteeism, increase productivity and decrease sick leave through the following programs:

- Physician-guided health screening
- Health risk appraisal
- Health audit
- Wellness navigator
- Executive physicals
- On-site health clinic
- Wellness portal

For more information, call (405) 271-2455 or visit

OSU-OKC INDUSTRY TRAINING

We measure OUR success by YOUR success.

Through a partnership between Cox Communications and Oklahoma State University-Oklahoma City, the Cox Reaching Higher program has allowed 26 Cox employees to pursue their undergraduate degrees over the last two years. Cox is dedicated to strengthening its workforce from within, and OSU-OKC helped develop a program that did just that.

Going back to college as an adult presents the unique challenge of balancing a job, family, and school. OSU-OKC’s program was specifically designed to address this challenge. Thanks to the support and guidance of the staff and instructors at OSU-OKC, the program has been a huge success. One employee said, “Cox’s investment in my future and belief that I can positively impact our business has increased my morale and loyalty to our company.”
ECONOMIC INDICATORS

Oklahoma Boasts Low State Tax Cost of Doing Business

- Oklahoma companies benefit most from low corporate income and property tax burdens.
- OK ranks No. 9 for corporate headquarters.
- OK ranks No. 5 for distribution centers.
